

WEAVING + DESIGNING QUALITY TEXTILES

Geelong Textiles is a trusted, reliable and leading partner for Australian made upholstery and apparel fabrics. Our weaving mill is situated the heart of one of Australia's most historic wool and textile manufacturing regions.

We offer more than 50 years of experience in quality woollen and worsted weaving. We create custom fabrics using sustainable and economic methods, whilst maintaining the highest level of service with quality materials.

Our Australian made commercial fabrics are durable and stylish, suitable for high traffic and heavy duty applications in public spaces and public transport applications.

We cover all required quality and safety specifications and are 100% Australian manufactured. We are specialised in developing commercial fabrics for auditoria and theatre seating, where smaller production quantities often provide an obstacle for designers or developers.

Our expert design team can assist in exploring options and solutions to create a unique design or concept. Our capabilities can quite often be adapted to work for other types of products or applications. Based on your specifications we can develop a variety of textiles using fibres including wool, wool blends, cotton, linen and bamboo. We offer a full range of fabrics from our Dobby and Jacquard weaving machines, fabric dyeing and yarn dyeing.

All our Upholstery and Homeware fabrics conform to AS2687-1997.
